

Gardens at Night Adhesive Lined End Cap Sizing Guide

Seal and protect joins from moisture and against the elements using quality Gardens at Night Adhesive Lined End Heat Shrink Caps made from high density and durable, Crosslinked Polyolefin.

Adhesive Lined End Caps are available in various sizes to suit different low voltage cable sizes. Caps should be at least 1/3 larger than the join for optimum result and require the use of both heat and pressure for a quality seal.

For further information refer to Installation Instructions for your landscape lighting product and Joining Methods Chart available in our Technical Resources page.

CAP	CABLE
GANAH-5-1	1.3mm Cable and single fitting Cable
GANAH-6-2	1.3mm Cable
